ABCO Health Care Pty Ltd

ABCO Change Table

Introducing our versatile change table, perfect for schools, accommodation, sports, and special needs facilities. Designed with twin columns, it offers a sturdy structure that ensures no lengthwise movement while adjusting height. The clear space between the base and top enhances safety while the 155mm base clearance allows for mobile hoist transfer.

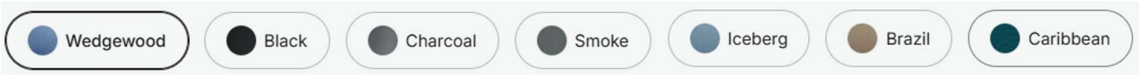

Our change table grows with the user, thanks to interchangeable tops, and optional padded cot sides can be added or removed as needed. With a minimum height of less than 500mm, clients can transfer independently from a wheelchair or with a hoist, and carers can adjust the working height up to 890mm using the foot control.

For added convenience, the table features four individually braked wheels, making it easy to move without compromising stability. One wheel has a directional locking brake for better control

Experience the perfect blend of safety, convenience, and adaptability with our change table, designed to meet the needs of both users and carers.
