

ABCO Change Table – Therapy Plus

Optimise your specialised care with the ABCO Change Table – Therapy Plus. This premium table elevates patient management by adding Tente central locking castors to reduce OHS risks and manual handling strain, alongside pre-programmed reset and emergency smart positioning. A heavy-duty, highly adjustable table engineered to provide dignity, comfort and security for disability patients. Built for high-frequency care in rehabilitation, disability support, and clinical change environments, this premium table combines true vertical electric lift columns with integrated safety cot sides and cot ends to create a completely secure environment for high-support needs.

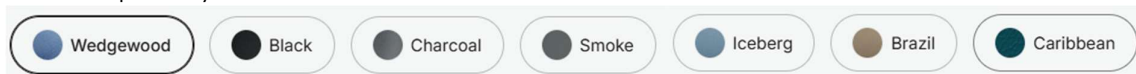

Featuring a smooth, electrically adjustable negative backrest, the table can decline below horizontal, making it much easier to position patients comfortably and assist with specialized respiratory or postural drainage therapies. Designed to eliminate manual handling risks for carers while ensuring vulnerable patients feel safe, stable, and fully supported, it brings ultimate peace of mind to daily care and therapeutic workflows.

- **Integrated Safety Cot Sides & Ends:** Full-perimeter protection designed to create a completely secure, reassuring environment for high-support and disability patients. The integrated cot sides drop down smoothly to allow unobstructed, dignified patient transfers.
- **Electric Negative Backrest:** Effortlessly transitions from flat to a negative incline to assist with specialized respiratory or postural drainage therapies, and ease patient positioning.
- **Tente Central Locking Castors:** A single, accessible foot pedal instantly locks, unlocks, or steers the entire base, ensuring rock-solid stability during patient transfers and precise movement when mobile.
- **Smart Positions:** The intuitive hand and foot controllers feature a one-touch Emergency command for rapid therapeutic positioning and a standard Reset button to quickly return the table to a neutral position.
- **Vertical Electric Lift (50cm to 90cm):** Rises straight up and down to save space in compact consult rooms while reducing mechanical wear.
- **300kg Lifting Capacity:** Confidently accommodates a diverse patient demographic with smooth, dignified height adjustments.
- **Pinch-Free Design:** The column-lift mechanism eliminates dangerous scissor-action pinch points, creating a safer clinical environment.
- **Infection Control:** Fluid-resistant medical vinyl easily withstands harsh clinical disinfectants.
- **Dual-Control System:** Comes standard with both a Foot Controller and Hand Controller, allowing carers to maintain hands-on patient contact while adjusting the table, actively reducing manual handling risks and OHS hazards

Factory Fitted Options

- Choice of upholstery colours

- Increase width to 800mm

Add-ons

Useful additions to your table which can be factory installed when ordering or after purchase with minimal DIY required.
