

ABCO 2 Section Cardiac / Ultrasound / Imaging Couch

The ABCO Cardiac / Ultrasound / Imaging Couch, developed and manufactured in Australia, is designed to handle patients up to 300kg with a clean, uncluttered structure.

It features a cardiac cut-out that drops down for unhindered access to the torso, enhancing patient care.

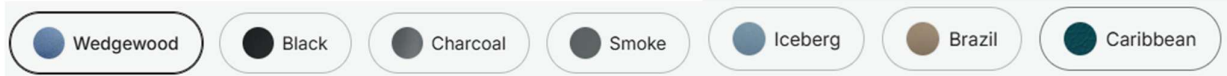

The two-column structure improves safety by reducing the risk of fingers or limbs getting caught. With a minimum height of 51cm, it ensures easy access for frail or disabled patients.

The braked castor system allows for easy movement without compromising stability. Additionally, the height, $\pm 15^\circ$ Trendelenburg, and backrest are all electrically adjustable using a foot control, leaving both hands free for treatment.

The robust structure, capable of supporting up to 300kg, ensures a long, trouble-free life, making it a reliable choice for medical settings.

Factory Fitted Options

- Choice of upholstery colours

- Increase width to 800mm
- Central locking wheel system
