

ABCO Pilates Reformer

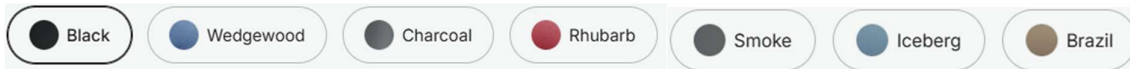

The ABCO Health Care Pilates Clinical Reformer, designed and manufactured in Australia, is perfect for helping patients with orthopaedic, neurological, and other pain conditions. Ideal for use in hospitals, physiotherapy, rehabilitation, clinic and home environments, it features unique extruded rails that securely retain the smooth-riding carriage. The foot bar, with its spring-loaded angle adjustment control, can be operated by foot during a session, adding to its convenience.

This reformer is easy to move, thanks to its integral wheels, and can be stored by stacking up to three high or upright when not in use. Non-slip feet ensure it stays securely in place, even on wooden floors. With a carriage height of 440mm, five springs offering varying resistances, an integrated steel foot board with a non-slip surface, and double function rope straps for hand or foot use, it's designed for versatility and comfort. The removable shoulder pads with integrated rope storage hooks and two length positions add to its adaptability. Optional accessories like a reformer box, jump board, and mat insert are also available. Plus, it comes with a 5-year warranty for peace of mind.

Factory Fitted Options
