

ABCO Electric Walking Rails

ABCO Electric Walking Rails | Parallel Bars are designed and manufactured in Australia. The column lifting system allows for vertical adjustment from 66cm - 106cm with no lateral movement reducing the amount of space required.

Completely Battery operated – which avoids electrical cables - the powerful 4Ah battery requires charging overnight once per week.

Fast accurate adjustment with digital height display is controlled from one end of each rail. As well as maximum and minimum heights, there are three user-settable memory positions which can be easily reset to user preferences.

The rails are shaped and lacquered hardwood timber for user comfort and good looks.

The shaped rails also encourage independent standing rather than grasping the rail for support.

With a flat top surface, they can also be used for balance control.

We also offer an option of round steel powder-coated rails if that is preferred. Available in 3m, 4m, 5m and 6m lengths. Other lengths available on request.

Lifting capacity of 300kg per rail and static load of 600kg per rail.

While it is possible to use the rails to lift patients from wheelchairs, we do not recommend this procedure.

Optional manual width adjustment of approx. 140mm per rail is an option that can be added to either or both rails.

Product Code: **WRFE.40CBM.66**

| Standard Configuration | Factory Fitted Options |
|---------------------------|---|
| 4m long | 3m, 5m, 6m long. Other lengths available on request |
| Fixed width between rails | Adjustable width between rails |
| Wooden Hand rails | Steel; 45mm; round |
