

ABCO Wall Mounted Rails

Timber Rail

Steel Rail

ABCO Wall Mounted Rails are designed and manufactured in Australia.

These rails are designed to be mounted on a wall at a fixed height to allow supported walking / gait training.

The standard length is 3m and brackets should be no more than 1250mm between centres as determined by mounting points on the wall. For lengths greater than 4m use multiple rails.

Timber rails are shaped and lacquered hardwood timber for user comfort and good looks. The shaped rails also encourage independent standing rather than grasping the rail for support. With a flat top surface, they can also be used for balance control.

Steel rails are 3m powder coated 42mm OD steel pipe with three mounting brackets mounted at 125cm centres on the rail.

Assembly / installation required.

Disclaimer. ABCO Health Care supplies rails and brackets as specified. Subject to adequate attachment to the wall, the safe working load is 200kg.

As every installation is different subject to wall type and strength, we do not provide fixings [screws / bolts etc] to attach the brackets to walls.

Product Code: **WRWx.x00**

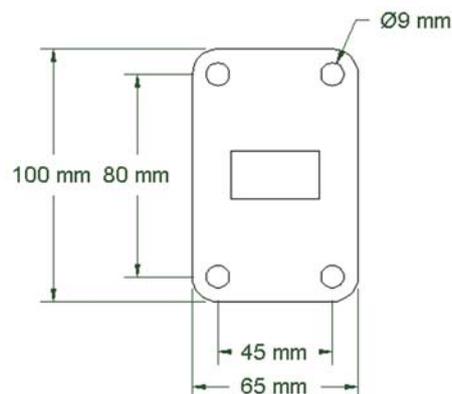

Standard Configuration	Factory Fitted Options
3m long	1 - 4m long
Wooden Hand rails	Steel; 42mm; round

Detailed Standard Specification			
		Timber	Steel
Dimensions	Height	184mm	182mm
